## Web Developer

### SKILLS

- \* HTML
- \* CSS
- \* JavaScript
- \* React
- \* Styled Components
- \* Node
- \* Express
- \* Gatsby.js
- \* Next.js
- \* MongoDB
- \* Git
- \* GraphQL

### WORK EXPERIENCE

#### North Country Union Jr High School– 2015–Present

Math teacher & Staff Programmer & School Leadership Team

- \* Created and maintained [School Dashboard](#) web application. This is used by all students, parents, and staff. The school was using a collection of disjointed apps to manage things like work tracking, scheduling, events, overdue work, discipline referrals, behavior systems, etc. The disjointed nature made it difficult for everyone to keep up with everything going on in the school. This application centralizes all school-related information in a single place and gives all stakeholders quick access to exactly the information needed for their role. Work completion has improved and parents appreciate the quick overview of their student's progress. I have built this application twice. It was originally built using an Express node SSR app that was templated using Pug. It has been rebuilt with React using Next.js for the front end and Keystone.js for the backend with MongoDB - [Front End](#) - [Back End](#)
- \* Created a [book database](#) to help students and staff find books by social topics mentioned in the book such as gender, race, sexual orientation. This is frequently used by students and teachers to easily find relevant books in the school library. Built using Gatsby front end and a Sanity.io CMS backend.
- \* Supervise school coding club. Students' projects include programs to help automate math tasks like finding slope or the equation of a line to more elaborate projects like a text-based game in python or an adventure game using javascript.  
<https://textbasedstarter-1.grimgarbage.repl.co/>
- \* General technology support for school staff
- \* Teaching pre-algebra, algebra, and coding
- \* Math Department representative for school and district leadership teams

#### NCUHS Adult Education – 2013–Present

Instructor for evening classes in Digital Photography and Microsoft Excel

#### Fred's Plumbing & Heating – 2007–2012

Estimator & Inside Sales

- \* Created and maintained job estimation spreadsheets and databases.
- \* Automated pricing and purchasing by web scraping supplier websites.
- \* Communicated directly with customers on sales and technical support issues.

#### North Country Engineering – 2001–2007

2nd Shift Supervisor

- \* Supervised a team of 10 machinists.
- \* Conducted quality control inspections.

### EDUCATION

**Mathematics with Secondary Education License.** Lyndon State College. Class of 2015.

**A.A. Business Management.** Community College of Vermont. Class of 2011.
